*Allowable Subject Matter*

1. Claims 3, 8-11, 16, and 17 are allowed. The following is an examiner's statement of reasons for allowance:

- a. As for **claims 3, 8-10, and 16**, the prior art of record fails to sufficiently describe or suggest a system for location search of a data processing device including a wireless communications unit and a unit to output received radio wave information for location detection, the system comprising a region information database storing space identification information specifying a spatial range associated with postional coordinate information. The region information includes a predetermined control process for the spatial range. These along with further limitations set forth render the claims allowable over the prior art of record.
- b. As for **claims 11 and 17**, the prior art of record fails to sufficiently describe or suggest a system for location search of a data processing device including a wireless communications unit and a unit to output received radio wave information for location detection, the system comprising a region information database storing region information including space identification information specifying a spatial range associated with the position coordinate information. The space identification information includes a space name for each spatial range, range identification information for identifying a spatial range set, and entrance/exit information for indicating the position of an entrance/exit with respect to the spatial range. A search unit includes a movement detection means for detecting that the data processing device has moved to a different

spatial range. These along with further limitations set forth render the claims allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
